

## PRESS RELEASE

# The Institute for Systems Engineering presents its latest publications on the future of Systems Engineering in the UK

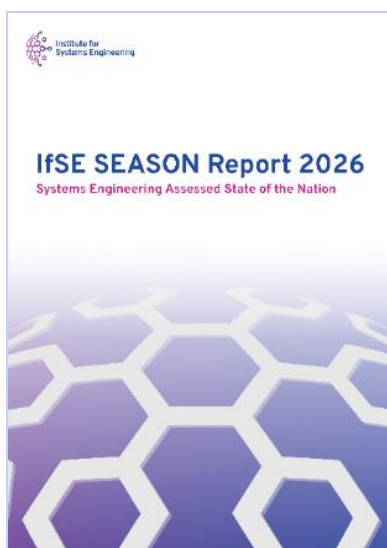

We are excited to announce two new publications by The Institute for Systems Engineering (IfSE), *'Presenting The Institute for Systems Engineering'* and *'IfSE SEASON Report 2026'*.

*'Presenting The Institute for Systems Engineering'*, is a white paper outlining IfSE's plans to become the leading authority in Systems Engineering across the UK, whilst continuing to build relationships globally through INCOSE. This was written as a transformative journey, shaping the future of Systems Engineering through IfSE.

*"Presenting The Institute for Systems Engineering is a journey about IfSE, who we are and what we are. Our goal is to have a world where systems engineers enhance professional competence, broaden sector influence and deliver global excellence, shaping the future of Systems Engineering by creating positive impacts across industry and society."* – **Andrew Pemberton, IfSE President**

***'Presenting The Institute for Systems Engineering' is available as a free PDF download on the 'About Us' page on the [IfSE website](#).***

The *'Systems Engineering Assessed State of the Nation Report'* is the first SEASON Report published under the name IfSE. It succeeds the INCOSE UK SEASON Report, the last of which was published in 2020 and features a mixture of new and updated information. The report provides summaries of Systems Engineering and its professionalism in the UK.

*"The SEASON Report addresses how systems engineers are aligned with key international practice and identifies areas of distinctiveness of the Systems Engineering practice in the UK. The production of the SEASON Report couldn't have been done without the team effort from various members of the IfSE Council, academia and the IfSE Secretariat."* – **Tim Rabbets, Outreach Director**

## PRESS RELEASE

**The 'Systems Engineering Assessed State of the Nation Report 2026' is available as a free PDF download on the 'Outreach' page on the [IfSE website](#).**

Thank you to Amentum, BAE Systems, BMT, Burge Hughes Walsh, Edinburgh Systems, Frazer-Nash Consultancy, Scarecrow Consultants, University of Strathclyde and Synoptix for sponsoring the 'IfSE SEASON Report 2026' and 'Presenting The Institute for Systems Engineering'.

Hardcopies are also available to purchase on the [Online Store](#).

## PRESS RELEASE

### About The Institute for Systems Engineering (IfSE)

The Institute for Systems Engineering (IfSE), the home of Systems Engineering in the United Kingdom, is a Professional Engineering Institute licensed by the Engineering Council.

If you are looking for insights on how to practise Systems Engineering, then IfSE is the institute for you.

The 'flavour' of Systems Engineering most prevalent in the UK has developed into an open and inclusive practice that facilitates the application of Systems Thinking and Systems Engineering principles in domains outside of the traditional domains of defence and aerospace.

In recent years, the membership of IfSE has widened significantly from its roots, expanding to include domains such as automotive, rail, energy, civil engineering, space, medicine, and security. IfSE attracts members from all around the globe. For more information, please visit [www.ifse.org.uk](http://www.ifse.org.uk)

IfSE runs the UK's Annual Systems Engineering Conference (ASEC), a flagship event that brings together professionals and practitioners from an array of backgrounds, with the common interest of building upon their Systems Engineering knowledge, networking and sharing ideas with their peers.

In addition to this, IfSE has a growing collection of publications, including the 'Don't Panic' range, beginner's guides to the different aspects of Systems Engineering, as well as the Advanced Applications books, Academic Journals, Educational and STEM books.

IfSE was formerly known as INCOSE UK and acts as the UK Chapter of the International Council on Systems Engineering (INCOSE), a not-for-profit membership organisation founded to develop and disseminate the interdisciplinary principles and practices that enable the realisation of successful systems.
